

From Drawing to Verified Measurement

We support industrial manufacturers, equipment integrators and engineering service providers with custom gauges, inspection fixtures, automated gauging/SPC solutions and precision-machined components.

FUNCTIONAL GAUGES & FIXTURES

- Functional gauges, plug/depth gauges and custom inspection fixtures
- Solutions for position, profile, coaxiality and assembly checks

AUTOMATED GAUGING & SPC

- Multi-parameter measurement and automated inspection equipment
- SPC workstations, data acquisition and production-line integration

PRECISION MACHINING

- Machining centers, 5-axis machining, CNC turning, grinding and wire EDM
- Precision parts, tooling, fixtures and mold-related components

TECHNICAL RESOURCES

KEY EQUIPMENT

Machining Centers | 5-Axis | CNC Turning
Grinding | Wire EDM

ZEISS CMM | Mahr Roundness & Contour Measurement

QUALITY MANAGEMENT

GB/T 19001-2016 / ISO 9001:2015

Certificate 125724Q0055R0S | Valid through 13 June 2027

Certified scope: machining of mechanical precision parts

Project-specific materials, tolerances, dimensions, inspection requirements and lead times are confirmed after drawing review.

SELECTED PROJECT EXPERIENCE

Precision component machining experience for projects involving major international industrial manufacturers, including Bosch* and Mitsubishi Heavy Industries*.
